GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

TO ALL WATER USERS FILING SUPPLEMENTAL STATEMENTS OF WATER DIVERSION AND USE MARCH 2006

Enclosed is your Supplemental Statement of Water Diversion and Use Form (Statement) for years **2003, 2004, and 2005**. All Statements should be completed and postmarked no later than **JULY 1, 2006** for delivery to the State Water Resources Control Board (State Water Board). If you do not file a Statement for six consecutive years, your use will be considered inactive, and the State Water Board will no longer mail you Statements to record your diversion and use of water. If you wish to reactivate an inactive Statement, please contact our office.

We ask for your assistance in correcting any errors that may be shown on the enclosed Statement(s) so that we can update our database. Please review the information in the upper half of the form and make any corrections or additions in red ink or pencil (e.g., corrections to current ownership, address, phone number, agent, etc.).

A separate Statement is required for each point of diversion. Please complete to the best of your knowledge each enclosed Statement for the specific point of diversion identified on the form. If the location of the existing point of diversion has changed, please identify the new location. However, if you have developed a new point of diversion, in addition to the existing point of diversion, please contact us, and we will supply you with a separate form to record the new diversion.

Please contact Susan Wilson at (916) 341-5315 if you have any questions or need assistance.
